

Exciting News from Hunsdon Active

You may have noticed that the seesaw and springer have been removed from the park recently, but don't worry because they will soon be replaced by a new springer and a rope climber. Hopefully the new equipment will be installed by the end of May, in time for Whitsun week.

The Parish Council is also getting prices for new matting around the multi-slide equipment and a new picnic table will also be installed.

This work, using section 106 money, represents just the beginning of the refurbishment of the park, and there is more to come when grants and funds have been identified to support the planned development.

Once this phase is complete we will update you with more news of stage two.
